Questions for customer:

- Is a limit of 1,000 unique student IDs per run acceptable?
- When an existing ID is entered again, should the new GPA replace that student's contribution to the average and Honors count, as implemented?
- Should the program continue counting statistics only for the current run, or should they persist between runs?
- Are the existing Honors threshold (GPA ≥ 3.50) and GPA range (0.00–4.00) still correct?
- Should the program keep the existing programmer name, "Jane Smith," and record filename, student_record.txt?
